| Sommario/riassunto      | The Netherlands have a long-termstanding experience concerning regarding the reuse of churches. The work delivers an in-depth analysis of current re-use practises and strategies that is following a mixed methods approach. Based on an initial policy analysis, 35 re-used churches were investigated by mapping their spatial and structural characteristics, complemented by governance and planning process related attributes. The work provides conditions, enablers and barriers for the German situation. |
