

1. Record Nr.	UNINA9910346958603321
Autore	Maltidis Georgios
Titolo	Seismic soil structure interaction of navigation locks
Pubbl/distr/stampa	KIT Scientific Publishing, 2017
ISBN	1000073630
Descrizione fisica	1 electronic resource (XXXI, 376 p. p.)
Collana	Karlsruher Reihe Massivbau, Baustofftechnologie, Materialprüfung / Institut für Massivbau und Baustofftechnologie ; Materialprüfungs- und Forschungsanstalt Karlsruhe
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This work handles the seismic soil- and water structure interaction of navigation locks in the field of elastodynamics. The investigation is based on numerical analysis with the finite element method. The findings extend the results of available theories and studies and allow for a more precise analysis and design of such structures. Suggestions about the numerical analysis of such problems are also presented. The results can be used also for quay and retaining walls.
