

1. Record Nr.	UNINA9910346959803321
Autore	Piper David Amos
Titolo	Untersuchung der Gewitteraktivität und der relevanten großräumigen Steuerungsmechanismen über Mittel- und Westeuropa
Pubbl/distr/stampa	KIT Scientific Publishing, 2017
ISBN	1000072089
Descrizione fisica	1 online resource (VI, 298 p. p.)
Collana	Wissenschaftliche Berichte des Instituts für Meteorologie und Klimaforschung des Karlsruher Instituts für Technologie
Soggetti	Physics
Lingua di pubblicazione	Tedesco
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Thunderstorm activity is characterized by a pronounced spatiotemporal variability. For several countries in Europe, this variability is analyzed and attributed to large-scale drivers using multivariate statistical methods. The analysis of atmospheric teleconnections reveals a link between the long-term behavior of thunderstorm activity and natural climate variability.
