Note generali Nota di bibliografia Includes bibliographical references and index. Book Cover; Half-Title; Series-Title; Title; Copyright; Contents; Figures; Nota di contenuto Tables; Boxes; Preface; Acknowledgements; 1 Setting the scene; 2 Formula funding within a public finance framework: 3 The elements of formula funding; 4 Formula funding: a production function perspective; 5 Empirical methods; 6 Budgetary risk and formula funding; 7 Paying for quality: The case of UK general practitioners; 8 The political economy of formula funding; 9 Concluding comments; Technical appendix A: Some mathematics of risk pooling; Technical appendix B: Calculating measures of local health care supply ReferencesIndex The use of formulae has become widespread in recent years across Sommario/riassunto most developed countries. In the UK, a conservative estimate is that annually £150 billion of public service expenditure is distributed using formulae, in services such as health care, local government, social

security and higher education. This book offers a comprehensive

introduction to the theory and practice underlying the use of such formulae as a basis for funding public services. The philosophy, design and economic consequences of funding formulae have become key policy issues worldwide. However, till now,
