1. Record Nr.   UNINA9910349263503321

   Titolo   Verification, Model Checking, and Abstract Interpretation : 19th International Conference, VMCAI 2018, Los Angeles, CA, USA, January 7-9, 2018, Proceedings / / edited by Isil Dillig, Jens Palsberg

   Pubbl/distr/stampa   Cham : , : Springer International Publishing : , : Imprint : Springer, , 2018

   ISBN   9783319737218
                        331973721X

   Edizione   [1st ed. 2018.]

   Descrizione fisica   1 online resource (XVIII, 540 p. 103 illus.)

   Collana   Theoretical Computer Science and General Issues, , 2512-2029 ; ; 10747

   Disciplina   005.14

   Soggetti   Computer science
                        Software engineering
                        Computer networks
                        Machine theory
                        Compilers (Computer programs)
                        Computer Science Logic and Foundations of Programming
                        Software Engineering
                        Computer Communication Networks
                        Formal Languages and Automata Theory
                        Theory of Computation
                        Compilers and Interpreters

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Note generali   Includes Index.

   Nota di contenuto   Program verification -- Model checking -- Abstract interpretation -- Program synthesis -- Static analysis -- Type systems -- Deductive methods -- Program certification -- Decision procedures -- Theorem proving -- Program certification -- Debugging techniques -- Program transformation -- Optimization -- Hybrid and cyber-physical systems.

   Sommario/riassunto   This book constitutes the refereed proceedings of the 19th International Conference on Verification, Model Checking, and Abstract Interpretation, VMCAI 2018, held in Los Angeles, CA, USA, in January

2018. The 24 full papers presented together with the abstracts of 3 invited keynotes and 1 invited tutorial were carefully reviewed and selected from 43 submissions. VMCAI provides topics including: program verification, model checking, abstract interpretation, program synthesis, static analysis, type systems, deductive methods, program certification, decision procedures, theorem proving, program certification, debugging techniques, program transformation, optimization, and hybrid and cyber-physical systems.
