

1. Record Nr.	UNINA9910349285403321
Titolo	Calcitonin Gene-Related Peptide (CGRP) Mechanisms : Focus on Migraine // edited by Susan D. Brain, Pierangelo Geppetti
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2019
ISBN	3-030-21454-0
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (198 pages) : illustrations
Collana	Handbook of Experimental Pharmacology, , 0171-2004 ; ; 255
Disciplina	616.857 616.84912
Soggetti	Pharmacology Neurology Pain medicine Neurosciences Pharmacology/Toxicology Neurology Pain Medicine
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	1. CGRP Discovery and Timeline -- 2. CGRP Receptor Biology: Is There More Than One Receptor? -- 3. The Structure of the CGRP and Related Receptors -- 4. CGRP Receptor Signalling Pathways -- 5. Pathways of CGRP Release from Primary Sensory Neurons -- 6. CGRP in Animal Models of Migraine -- 7. CGRP in Human Models of Migraine -- 8. Role of CGRP in Migraine -- 9. Understanding CGRP and Cardiovascular Risk -- 10. CGRP and Painful Pathologies other than Headache -- 11. Calcitonin Gene-Related Peptide Antagonists and Therapeutic Antibodies.
Sommario/riassunto	This book is designed to focus on the role of Calcitonin Gene-Related Peptide (CGRP) in health and disease. This peptide, originally discovered in the 1980s as a sensory neuropeptide with cardiovascular effects, is now known to play a distinct role in the pain processing of migraine. The various chapters address the origin, localization and function of CGRP and its receptor in the peripheral nervous system, in

the cardiovascular system, and in other tissues and organs. Further attention is paid to the drug discovery pathway where recent findings show the beneficial effect of small molecule antagonists of the CGRP receptors for the relief of the migraine attack and of monoclonal antibodies against CGRP or the CGRP receptor for migraine prevention.
