

1. Record Nr.	UNINA9910349296703321
Titolo	Molecular Biology // editor, Stephen H Howell
Pubbl/distr/stampa	New York : , : Springer New York : , : Imprint : Springer, , 2020
ISBN	1-4939-0263-6
Descrizione fisica	1 online resource (400 p. 450 illus. in color.)
Collana	The Plant Sciences ; ; 1
Disciplina	581.35
Soggetti	Plant genetics Botanical chemistry Botany Plant anatomy Plant development
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Control of transcription (incl miRNA) -- Control of translation -- Macromolecular structures (carbohydrates, proteins etc) -- Enzyme function and enzyme-enzyme interactions -- Photosynthesis -- Primary metabolism -- Natural products chemistry (secondary metabolism) -- Proteomics -- Metabolomics -- Synthetic biology. .
Sommario/riassunto	The aim of this project is to produce a the world's most comprehensive reference in plant sciences. The Plant Sciences will be published both in print and online; the online text will be regularly updated to enable the reference to remain a useful authoritative resource for decades to come. The aim is to provide a sustainable superstructure on which can be built further volumes as plant science evolves. The first edition will contain ten volumes, with approximately 20-30 chapters per volume. The target audience for the initial ten volumes will be upper-division undergraduates, as well as graduate students and practitioners looking for an entry into a particular topic. The Encyclopedia will provide both background and essential information in plant biology. Topics will include plant genetics, genomics, biochemistry, natural products, proteins, cell biology, development, reproduction, physiology, ecology, evolution, systematics, biodiversity, and applications, including crop improvement and non-food applications.
