1. Record Nr.   UNINA9910349297503321

   Titolo   Software Technology: Methods and Tools : 51st International
                         Conference, TOOLS 2019, Innopolis, Russia, October 15–17, 2019,
                         Proceedings / / edited by Manuel Mazzara, Jean-Michel Bruel, Bertrand
                         Meyer, Alexander Petrenko

   Pubbl/distr/stampa   Cham : , : Springer International Publishing : , : Imprint : Springer, ,
                         2019

   ISBN   3-030-29852-3

   Edizione   [1st ed. 2019.]

   Descrizione fisica   1 online resource (XVIII, 420 p. 146 illus., 77 illus. in color.)

   Collana   Programming and Software Engineering ; ; 11771

   Disciplina   005.1
                         005.117

   Soggetti   Software engineering
                         Computer system failures
                         Computers
                         Artificial intelligence
                         Special purpose computers
                         Application software
                         Software Engineering
                         System Performance and Evaluation
                         The Computing Profession
                         Artificial Intelligence
                         Special Purpose and Application-Based Systems
                         Information Systems Applications (incl. Internet)

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico Monografia

   Nota di contenuto   Software Engineering and Programming Languages -- Machine
                         Learning -- Internet of Things -- Security Computer Architectures and
                         Robotics -- Projects.

   Sommario/riassunto   This book constitutes the refereed proceedings of the 51st
                         International Conference on Software Technology: Methods and Tools,
                         TOOLS 2019, held in Innopolis, Russia, in October 2019. The 19 revised
                         full papers and 13 short papers presented in this book were carefully

reviewed and selected from 62 submissions. The papers discuss all aspects of software engineering and programming languages; machine learning; internet of things; security computer architectures and robotics; and projects.
