1. Record Nr. UNINA9910349297803321

Autore	Chen Min
Titolo	OPNET IoT Simulation / / by Min Chen, Yiming Miao, Iztok Humar
Pubbl/distr/stampa	Singapore : , : Springer Singapore : , : Imprint : Springer, , 2019
ISBN	981-329-170-2
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (XXI, 674 p. 498 illus., 414 illus. in color.)
Disciplina	003.3
Soggetti	Computer simulation Simulation and Modeling
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Evolution of the Internet of Things -- Introduction to OPNET Network Simulation -- OPNET Simulation of Sensor Network -- Large Sensor Network OPNET Model Debugging -- OPNET Network Layer Simulation -- Simulation of Green Internet of Things -- Smart IoT Simulation -- Broadband IoT Simulation -- Semi-physical Simulation -- Simulation of Narrow-Band Cellular Internet of Things -- Simulation of Wireless Network Caching -- Bibliography.
Sommario/riassunto	This is the first book offering an in-depth and comprehensive IoT network simulation, supported by OPNET tool. Furthermore, the book presents the simulations of IoT in general, not limited by OPNET. The authors provide rich OPNET IoT simulation codes, with detailed explanation regarding the functionalities of the model. These codes can facilitate readers' fast implementation, and the shared model can guide readers through developing their own research. This book addresses various versions of Internet of Things (IoT), including human-centric IoT, green IoT, Narrow band IoT, Smart IoT, IoT-Cloud integration. The introduced OPNET IoT simulation provides a comprehensive platform to simulate above-mentioned IoT systems. Besides, this book introduces OPNET semi-physical simulation in detail. Based on this technology, simulated IoT and practical cloud are seamlessly connected with each other. On top of this "IoT-cloud-integration" semi-physical simulation environment, various smart IoT applications can be realized.
