1. Record Nr.   UNINA9910349308403321

   Titolo   Algorithmic Aspects in Information and Management : 13th
                       International Conference, AAIM 2019, Beijing, China, August 6–8, 2019,
                       Proceedings / / edited by Ding-Zhu Du, Lian Li, Xiaoming Sun, Jialin
                       Zhang

   Pubbl/distr/stampa Cham : , : Springer International Publishing : , : Imprint : Springer, ,
                       2019

   ISBN   3-030-27195-1

   Edizione   [1st ed. 2019.]

   Descrizione fisica 1 online resource (IX, 354 p. 67 illus., 9 illus. in color.)

   Collana   Theoretical Computer Science and General Issues, , 2512-2029 ; ;
                       11640

   Disciplina   005.1

   Soggetti   Computer science—Mathematics
                       Discrete mathematics
                       Numerical analysis
                       Algorithms
                       Artificial intelligence—Data processing
                       Discrete Mathematics in Computer Science
                       Numerical Analysis
                       Data Science

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Note generali   Includes index.

   Nota di contenuto   One-Dimensional r -Gathering under Uncertainty -- Improved
                       Algorithms for Ranking and Unranking (k,m)-Ary Trees -- A
                       Probabilistic Algorithm for Verication of Geometric Theorems --
                       Approximating Closest Vector Problem in innte Norm Revisited --
                       Low-Dimensional Vectors with Density Bounded by 5/6 are Pinwheel
                       Schedulable -- Constant-Factor Greedy Algorithms for the Asymmetric
                       p -Center Problem in Parameterized Complete Digraphs -- Updating
                       Matrix Polynomials -- On the Structure of Discrete Metric Spaces
                       Isometric to Circles -- A 2.57-Approximation Algorithm for Contig-
                       based Genomic Scaold Filling -- Prot Parameterizations of
                       Dominating Set -- Exponential Time Approximation Scheme for TSP --
                       Interaction-aware Inuence Maximization and Iterated Sandwich

Method -- An approximation algorithm of the edge metric dimension problem -- The Seeding Algorithm for Spherical k-Means Clustering with Penalties -- Approximation algorithm for the correlation clustering problem with non-uniform hard constrained cluster sizes -- Two-Way Currency Trading Algorithms in the Discrete Setting -- Approximation Algorithms for the Minimum Power Partial Cover Problem -- On approximations for constructing required subgraphs using stock pieces of xed length -- A primal dual approximation algorithm for the multicut problem in trees with submodular penalties -- Algorithm aspect on the Minimum (Weighted) Doubly Resolving Set Problem of Graphs -- Trajectory Optimization of UAV for Ecient Data Collection from Wireless Sensor Networks -- Locality Sensitive Algotrithms for Data Mule Routing Problem -- Maximize a Monotone Function with a Generic Submodularity Ratio -- Approximation Algorithm for Stochastic Prize-Collecting Steiner Tree Problem -- A general framework for path convexities -- An approximation algorithm for the dynamic k-level facility location problem -- Weighted Two-Dimensional Finite Automata -- Improved Parameterized Algorithms for Mixed Domination -- New Results on the Zero-Visibility Cops and Robber Game -- A two-stage constrained submodular maximization -- Local search approximation algorithms for the spherical k-means problem.

| Sommario/riassunto | This volume constitutes the proceedings of the 13th International Conference on Algorithmic Aspects in Information and Management, AAIM 2019, held in Bejing, China in August 2019. The 31 full papers presented were carefully reviewed and selected. The papers deal with most aspects of theoretical computer science and their applications. Special considerations are given to algorithmic research that is motivated by real-world applications. . |
