

1. Record Nr.	UNINA9910349337703321
Autore	Hayman Walter K
Titolo	Research Problems in Function Theory [[electronic resource]] : Fiftieth Anniversary Edition // by Walter K. Hayman, Eleanor F. Lingham
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2019
ISBN	3-030-25165-9
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (VIII, 284 p. 1 illus.)
Collana	Problem Books in Mathematics, , 0941-3502
Classificazione	30D35 30C55
Disciplina	515.9
Soggetti	Functions of complex variables Potential theory (Mathematics) Functions of a Complex Variable Several Complex Variables and Analytic Spaces Potential Theory
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	1 Meromorphic Functions -- 2 Entire Functions -- 3 Subharmonic and Harmonic Functions -- 4 Polynomials.-5 Functions in the Unit Disk -- 6 Univalent and Multivalent Functions -- 7 Miscellaneous -- 8 Spaces of Functions -- 9 Interpolation and Approximation.
Sommario/riassunto	In 1967 Walter K. Hayman published 'Research Problems in Function Theory', a list of 141 problems in seven areas of function theory. In the decades following, this list was extended to include two additional areas of complex analysis, updates on progress in solving existing problems, and over 520 research problems from mathematicians worldwide. It became known as 'Hayman's List'. This Fiftieth Anniversary Edition contains the complete 'Hayman's List' for the first time in book form, along with 31 new problems by leading international mathematicians. This list has directed complex analysis research for the last half-century, and the new edition will help guide future research in the subject. The book contains up-to-date information on each problem, gathered from the international mathematics community, and where possible suggests directions for

further investigation. Aimed at both early career and established researchers, this book provides the key problems and results needed to progress in the most important research questions in complex analysis, and documents the developments of the past 50 years.
