Sommario/riassunto	Literature as cultural discourse has always courted mobility. From the nomadic wanderings of the heroes of Homer and Virgil through the adventures of the medieval knight-errants to the travellers of modern times, movement and mobility have been constitutive elements of story-telling. Since writers have begun to explore the experiential dimension of movement their texts have embraced the essential changeability and instability of 'mobile worlds'. In this sense literature reflects and processes the transformative force of movement on the perception of the world and is part of the broader cultural discourses of mobility. From the 1936 film Night Mail to the rapid movements of the dime novel detective and the metaphorical coding of automobility in Futurist poetry, the essays in this volume offer new perspectives on the phenomenon of mobility at the intersection between the literary imagination and cultural experience. They explore movement as a decisive force of change in the history of modernity and show how literature in its representation of mobility simultaneously aims both to mirror and to grasp the phenomenon.

Conclusions and Recommendations.

Sommario/riassunto

This book addresses the legal feasibility of ethnic data collection and positive action for equality and anti-discrimination purposes, and considers how they could be used to promote the Roma minority's inclusion in Europe. The book's central aim is to research how a societal problem can be improved upon from a legal perspective. The controversy surrounding ethnic data collection and positive action severely limits their use at the national level. Accordingly, legal and political concerns are analysed and addressed in order to demonstrate that it is possible to collect such data and to implement such measures while fully respecting international and European human rights norms, provided that certain conditions are met. Part I focuses on ethnic data collection and explores the key rules and principles that govern it, the ways in which this equality tool could be used, and how potential obstacles might be overcome. It also identifies and addresses the specific challenges that arise when collecting ethnic data on the Roma minority in Europe. In turn, Part II explores positive action and the broad range of measures covered by the concept, before analysing the applicable international and European framework. It reviews the benefits and challenges of implementing positive action for Roma, identifies best practices, and gives special consideration to inter-cultural mediation in the advancement of Roma inclusion. The book concludes with an overview of the main findings on both topics and by identifying three essential elements that must be in place, in addition to full respect for the applicable legal rules, in order to combat discrimination and achieve the inclusion of Roma in Europe by complementing existing anti-discrimination frameworks with the collection of ethnic data and the implementation of positive action schemes.
