

1. Record Nr.	UNINA9910349373603321
Titolo	Endocrinology and Systemic Diseases [[electronic resource] /] / edited by Piero Portincasa, Gema Frühbeck, Hendrik M. Nathoe
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2020
ISBN	3-319-66362-3
Descrizione fisica	1 online resource (X, 400 p.)
Collana	Endocrinology, , 2510-1927
Disciplina	616.4
Soggetti	Endocrinology Cardiology Gastroenterology Nephrology Critical care medicine Geriatrics Endocrinology Gastroenterology Intensive / Critical Care Medicine Geriatrics/Gerontology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Impact of endocrine disorders on typical and atypical cardiovascular risk factors -- Impact of endocrine disorders on blood pressure -- Impact of endocrine disorders on the heart -- Impact of endocrine disorders on vasculature -- Impact of endocrine disorders on the kidney -- Impact of endocrine disorders on the liver -- Impact of endocrine disorders on gastro-intestinal diseases -- Impact of endocrine disorders on autoimmune diseases -- Neuroendocrine involvement in immune mediated rheumatic diseases -- Impact of endocrine disorders on hematologic diseases -- Impact of endocrine disorders on skin disorders -- Endocrine disorders and neurologic manifestations -- Endocrine disorders and psychiatric manifestations -- Impact of endocrine disorders in the critically ill -- Impact of endocrine disorders in the elderly.

This work offers a comprehensive reference guide to help clinicians in the field of Internal Medicine address common aspects of endocrinology in their daily practice. The exponential growth in our knowledge of biomedicine calls for continuous multidisciplinary approaches across specialists and disciplines. In this volume, recognized experts in each given area explore the complex mechanisms linking endocrinological disorders to abnormalities of the cardiovascular system, kidney, liver and gastrointestinal tract, autoimmune, neuro-psychiatric, rheumatic, hematological, and dermatologic diseases. Aspects connected to critically ill and elderly patients are also examined, helping to enhance daily interactions with the most fragile populations observed in clinical medicine. The individual chapters are designed to deliver the required information while explaining pathophysiological mechanisms with the help of figures, flow-charts and updated guidelines. The book offers a valuable resource for all clinicians, residents, specialists and physicians who manage systemic diseases. .
