1. Record Nr.   UNINA9910349385203321

   Titolo   Advances in Computational Intelligence : 17th Mexican International
                        Conference on Artificial Intelligence, MICAI 2018, Guadalajara, Mexico,
                        October 22–27, 2018, Proceedings, Part II / / edited by Ildar Batyrshin,
                        María de Lourdes Martínez-Villaseñor, Hiram Eredín Ponce Espinosa

   Pubbl/distr/stampa   Cham : , : Springer International Publishing : , : Imprint : Springer, ,
                        2018

   ISBN   3-030-04497-1

   Edizione   [1st ed. 2018.]

   Descrizione fisica   1 online resource (XXIV, 371 p. 133 illus., 67 illus. in color.)

   Collana   Lecture Notes in Artificial Intelligence ; ; 11289

   Disciplina   006.3

   Soggetti   Artificial intelligence
                        Data mining
                        Special purpose computers
                        Optical data processing
                        Artificial Intelligence
                        Data Mining and Knowledge Discovery
                        Special Purpose and Application-Based Systems
                        Image Processing and Computer Vision

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Nota di bibliografia   Includes bibliographical references and index.

   Nota di contenuto   Knowledge Representation, Reasoning, and Optimization -- Coding 3D
                        connected regions with F26 chain code -- Finding optimal farming
                        practices to increase crop yield through Global-best Harmony Search
                        and predictive models, a data-driven approach -- On the Modelling of
                        the Energy System of a Country for Decision Making Using Bayesian
                        Artificial Intelligence { A case study for Mexico -- Natural Language
                        Processing -- Enhancement of performance of document clustering in
                        the authorship identification problem with a weighted cosine similarity
                        -- Exploring the Context of Lexical Functions -- Towards a Natural
                        Language Compiler -- Comparative analysis and implementation of
                        semantic-based classifiers -- Best Paper award, second place: Topic-
                        Focus Articulation: A Third Pillar of Automatic Evaluation of Text
                        Coherence -- A Multilingual Study of Compressive Cross-Language

Text Summarization -- WiSeBE: Window-based Sentence Boundary Evaluation -- Readability Formula for Russian Texts: a Modified Version -- Timed automaton RVT-grammar for workflow translating -- Extraction of Typical Client Requests from Bank Chat Logs -- A Knowledge-based Methodology for Building a Conversational Chatbot as an Intelligent Tutor -- Top-k Context-Aware Tour Recommendations for Groups -- A Knowledge-based Weighted kKNN for Detecting Irony in Twitter -- Model for Personality Detection based on Text Analysis -- Analysis of Emotions through Speech Using the Combination of Multiple Input Sources with Deep Convolutional and LSTM Networks -- Robustness of LSTM Neural Networks for the Enhancement of Spectral Parameters in Noisy Speech Signals -- Tensor Decomposition for Imagined Speech Discrimination in EEG -- Robotics and Computer Vision -- A new software library for mobile sensing using FIWARE technologies -- Free model task space controller based on adaptive gain for robot manipulator using Jacobian estimation -- Design and Equilibrium Control of a Force-Balanced One-Leg Mechanism -- An Adaptive Robotic Assistance Platform for Neurorehabilitation Therapy of Upper Limb -- ROBMMOR: An experimental robotic manipulator for motor rehabilitation of knee -- A Bio-inspired Cybersecurity Scheme to Protect a Swarm of Robots -- Chaos optimization applied to a beamforming algorithm for source location -- Data Augmentation in Deep Learning-based Obstacle Detection System for Autonomous Navigation on Aquatic Surfaces -- Best Paper award, third place: Combining Deep Learning and RGBD SLAM for Monocular Indoor Autonomous Flight.

Sommario/riassunto	The two-volume set LNAI 11288 and 11289 constitutes the proceedings of the 17th Mexican International Conference on Artificial Intelligence, MICAI 2018, held in Guadalajara, Mexico, in October 2018. The total of 62 papers presented in these two volumes was carefully reviewed and selected from 149 submissions. The contributions are organized in topical as follows: Part I: evolutionary and nature-inspired intelligence; machine learning; fuzzy logic and uncertainty management. Part II: knowledge representation, reasoning, and optimization; natural language processing; and robotics and computer vision.
