Sommario/riassunto

As an important contribution to debates on property theory and the
role of law in creating, disputing, defining and refining property rights,
this volume provides new theoretical material on property systems, as
well as new empirically grounded case studies of the dynamics of
property transformations. The property claimants discussed in these
papers represent a diverse range of actors, including post-socialist
states and their citizens, those receiving restitution for past property
losses in Africa, Southeast Asia and in eastern Europe, collectives,
corporate and individual actors. The volu

Sommario/riassunto

This book constitutes the refereed proceedings of the Second International Symposium on Cyber Security Cryptography and Machine Learning, CSCML 2018, held in Beer-Sheva, Israel, in June 2018. The 16 full and 6 short papers presented in this volume were carefully reviewed and selected from 44 submissions. They deal with the theory, design, analysis, implementation, or application of cyber security, cryptography and machine learning systems and networks, and conceptually innovative topics in the scope.
