

1. Record Nr.	UNINA9910349441703321
Autore	Clément Claude
Titolo	Brain-Computer Interface Technologies : Accelerating Neuro-Technology for Human Benefit // by Claude Clément
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2019
ISBN	9783030278526
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (XVIII, 281 p. 150 illus., 119 illus. in color.)
Disciplina	610.28 612.80285
Soggetti	Biomedical engineering Neurosciences Neurobiology User interfaces (Computer systems) Biomedical Engineering/Biotechnology Biomedical Engineering and Bioengineering User Interfaces and Human Computer Interaction
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Foreword -- Introduction -- From Concept to Patients -- Targets of Neuro-Technologies -- The human body: a special environment -- Below and above the neck -- Pioneers -- Doers -- New technologies -- Dreamers -- Is it worth the effort? -- Conclusions.
Sommario/riassunto	This book is about the field of brain-computer interfaces (BCI) and the unique and special environment of active implants that electrically interface with the brain, spinal cord, peripheral nerves, and organs. At the heart of the book is the matter of repairing and rehabilitating patients suffering from severe neurologic impairments, from paralysis to movement disorders and epilepsy, that often requires an invasive solution based on an implanted device. Past achievements, current work, and future perspectives of BCI and other interactions between medical devices and the human nervous system are described in detail from a pragmatic point of view. Reviews the Active Implantable Medical Devices (AIMDs) industry and how it is moving from cardiac to neuro

applications Clear, easy to read, presentation of the field of neuro-technologies for human benefit Provides easy to understand explanations about the technical limitations, the physics of implants in the human body, and realistic long terms perspectives.
