Autore	Vasconcelos Tiago S
Titolo	Biogeographic Patterns of South American Anurans // by Tiago S. Vasconcelos, Fernando R. da Silva, Tiago G. dos Santos, Vitor H. M. Prado, Diogo B. Provete
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2019
ISBN	3-030-26296-0
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (155 pages)
Disciplina	597.89
Soggetti	Animal ecology Biodiversity Conservation biology Ecology Animal Ecology Conservation Biology/Ecology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	An Introduction to the Biogeography of South American Anurans -- South American Anurans: Species Diversity and Description Trends Through Time and Space -- Patterns of Species Richness, Range Size, and their Environmental Correlates of South American Anurans -- Spatial Distribution of Phylogenetic Diversity of South American Anurans -- Geographical Patterns of Functional Diversity of South American Anurans -- Biogeographic Regionalization of South American Anurans -- Spatial Conservation Prioritization for the Anuran Fauna of South America.
Sommario/riassunto	This book analyzes different facets of anuran amphibian distribution in South America. We integrate alternative biological metrics employing cutting-edge methods to understand the dynamic processes underlying species distribution patterns. By using the modern biogeographic toolbox, we explore how richness gradients, phylogenetic diversity, functional diversity, and range size/endemism distribution of amphibians vary along the continent. Moreover, we present a robust

proposal for priority areas for conservation of anurans in South America
that maximizes representativeness of distinct biodiversity facets.
