

1. Record Nr.	UNINA9910349449903321
Titolo	Infections in Neutropenic Cancer Patients // edited by Ana Paula Velez, Jorge Lamarche, John N. Greene
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2019
ISBN	3-030-21859-7
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (187 pages)
Disciplina	616.994 616.9
Soggetti	Cancer - Research Infectious diseases Immunoglobulins Cancer Research Infectious Diseases Antibodies
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Central Nervous System Infections in Neutropenic Cancer Patients -- Head and Neck Infections.-Respiratory Infections -- Gastrointestinal and Genitourinary Infections -- Skin Infections.-Bacteremia in Neutropenic Patients -- Fungal Infections -- Neutropenic Fever -- Antifungal Medications in Neutropenia -- Antimicrobial Prophylaxis -- Antimicrobial Stewardship in Immunocompromised Host -- Index.
Sommario/riassunto	As bone marrow transplant treatments and chemotherapy develop, the population of neutropenic cancer patients is on the rise. These developments are allowing patients to live longer, but in recent years, they have also led to an increase in previously rare infections and syndromes, whose management is unfamiliar to the average healthcare professional. Infections in Neutropenic Cancer Patients is a crucial resource for medical students, residents, practitioners, health professionals, and researchers. It details the clinical presentation, diagnoses, and management of an array of common infections and syndromes specific to neutropenic cancer patients, including real

scenarios accompanied by color photos and radiographic results. Chapters include step-by-step tutorials, access to clinical answers on diagnosis and treatment, and a tabulated summary of the key points.
