Catching up with Industrial Needs -- Employing Graphical Risk Models to Facilitate Cyber-Risk Monitoring - the WISER Approach.

Sommario/riassunto	This book constitutes revised selected papers from the 4th International Workshop on Graphical Models for Security, GraMSec 2017, held in Santa Barbara, CA, USA, in August 2017. The 5 full and 4 short papers presented in this volume were carefully reviewed and selected from 19 submissions. The book also contains one invited paper from the WISER project. The contributions deal with the latest research and developments on graphical models for security.
