

1. Record Nr.	UNINA9910349476403321
Titolo	Advances in Energy and Environmental Materials : Proceedings of Chinese Materials Conference 2017 // edited by Yafang Han
Pubbl/distr/stampa	Singapore : , : Springer Nature Singapore : , : Imprint : Springer, , 2018
ISBN	9789811301582 981-13-0158-1
Edizione	[1st ed. 2018.]
Descrizione fisica	1 online resource (939 pages)
Collana	Springer Proceedings in Energy, , 2352-2542
Disciplina	620.11297
Soggetti	Energy storage Materials Catalysis Force and energy Renewable energy sources Environmental chemistry Mechanical and Thermal Energy Storage Materials for Energy and Catalysis Renewable Energy Environmental Chemistry
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Effect of Co-doping on the Structure, Magnetic and Hydrogen Absorption Properties of Fe ₁₇ Dy ₂ Compound -- Enhancement of Proton Conductivity of Polymer Electrolyte Membrane Enabled by Electrospun Nanofibers -- Preparation of Mechanical Alloying AlCuFe Alloy and Its Application in Li-ion battery Anode.
Sommario/riassunto	This proceedings volume gathers selected papers presented at the Chinese Materials Conference 2017 (CMC2017), held in Yinchuan City, Ningxia, China, on July 06-12, 2017. This book covers a wide range of energy conversion and storage materials, thermoelectric materials and devices, nuclear materials, solar energy materials and solar cells, minerals and oil and gas materials, photocatalytic materials for energy production, eco-materials, and environmental engineering materials.

The Chinese Materials Conference (CMC) is the most important serial conference of the Chinese Materials Research Society (C-MRS) and has been held each year since the early 1990s. The 2017 installment included 37 Symposia covering four fields: Advances in energy and environmental materials; High performance structural materials; Fundamental research on materials; and Advanced functional materials. More than 5500 participants attended the congress, and the organizers received more than 700 technical papers. Based on the recommendations of symposium organizers and after peer reviewing, 490 papers have been included in the present proceedings, which showcase the latest original research results in the field of materials, achieved by more than 300 research groups at various universities and research institutes.
