1. Record Nr. UNINA9910349476403321 Advances in Energy and Environmental Materials [[electronic resource]] Titolo : Proceedings of Chinese Materials Conference 2017 / / edited by Yafang Han Singapore:,: Springer Singapore:,: Imprint: Springer,, 2018 Pubbl/distr/stampa **ISBN** 9789811301582 981-13-0158-1 Edizione [1st ed. 2018.] Descrizione fisica 1 online resource (939 pages) Collana Springer Proceedings in Energy, , 2352-2534 Disciplina 620.11297 Soggetti Energy storage Materials science Force and energy Renewable energy resources Environmental chemistry **Energy Storage Energy Materials** Renewable and Green Energy **Environmental Chemistry** Lingua di pubblicazione Inglese Formato Materiale a stampa Livello bibliografico Monografia Nota di contenuto Effect of Co-doping on the Structure, Magnetic and Hydrogen Absorption Properties of Fe17Dy2 Compound -- Enhancement of Proton Conductivity of Polymer Electrolyte Membrane Enabled by Electrospun Nanofibers -- Preparation of Mechanical Alloying AlCuFe Alloy and Its Application in Li-ion battery Anode. Sommario/riassunto This proceedings volume gathers selected papers presented at the Chinese Materials Conference 2017 (CMC2017), held in Yinchuan City, Ningxia, China, on July 06-12, 2017. This book covers a wide range of energy conversion and storage materials, thermoelectric materials and devices, nuclear materials, solar energy materials and solar cells,

minerals and oil and gas materials, photocatalytic materials for energy production, eco-materials, and environmental engineering materials.

The Chinese Materials Conference (CMC) is the most important serial conference of the Chinese Materials Research Society (C-MRS) and has been held each year since the early 1990s. The 2017 installment included 37 Symposia covering four fields: Advances in energy and environmental materials; High performance structural materials; Fundamental research on materials; and Advanced functional materials. More than 5500 participants attended the congress, and the organizers received more than 700 technical papers. Based on the recommendations of symposium organizers and after peer reviewing, 490 papers have been included in the present proceedings, which showcase the latest original research results in the field of materials, achieved by more than 300 research groups at various universities and research institutes.
