

1. Record Nr.	UNINA9910349516603321
Autore	Kocsis Zoltán
Titolo	Theory and Practice of Wood Pellet Production // by Zoltán Kocsis, Etele Csanády
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2019
ISBN	3-030-26179-4
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (X, 118 p.)
Disciplina	620.12 662.65
Soggetti	Ceramics Glass Composites (Materials) Composite materials Forest products Manufactures Ceramics, Glass, Composites, Natural Materials Wood Science & Technology Manufacturing, Machines, Tools, Processes
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	General remarks -- Theory of compaction of bulk materials -- The practice of pellet making.
Sommario/riassunto	In the agriculture, forestry, the primary and secondary wood working industry there are considerable resources of raw materials which can only be used in a rational manner for energetic purposes. Due to requirements from the users. one of the most retinal way of utilization is to make pellets with high density and specific energy content. Making pellets of 6-8 mm diameter, their utilization in furnaces allows an almost fully automated operation with high thermal efficiency. This book describes both the theoretical and practical aspects of pellet production including material requirements and preparation, pressing technologies, quality requirements, burning properties, investments and the overall economy of pellet production.
