Sommario/riassunto

This book provides a comprehensive analysis of Waqf Management and its impact on socio-economic development, specifically financial inclusion and sustainable development as well as of the legal issues in Waqf management in IDB member countries and jurisdictions. It explores various aspects of Waqf management in IDB member countries/jurisdictions as well as in non-Muslim majority countries such as Waqf regulation, its modernization, and relationship to Maqasid Al-Shari'ah; performance of Waqf activities; time and activity-wise distribution of Waqf resource management; the antecedents and consequences of Waqf assets (both physical and cash); the strategies and models to promote Waqf related activities for greater socio-economic development; good governance practices through the formulation of informed policies for Waqf projects, among others. Comprising different issues and perspectives adopted by various researchers, the work is specifically designed to meet the needs of academics and industry practitioners in the field of Islamic finance.
