

1. Record Nr.	UNINA9910349560503321
Titolo	Anal Cancer : A Comprehensive Guide // edited by Jeffrey Meyer, Lisa Kachnic
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2019
ISBN	3-030-20253-4
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (140 pages) : illustrations
Disciplina	392 616.35
Soggetti	Radiotherapy Oncology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Anatomy and Histology of the Anus -- Epidemiology and Pathogenesis of Anal Cancer -- Staging and Initial Evaluation of Anal Cancer -- Treatment of Localized Anal Cancer: Chemoradiotherapy -- Anal Cancer: Toxicities and Management -- Management of Local-Regional Anal Cancer Recurrence -- Treatment of Advanced Anal Cancer -- Treatment of Non-Squamous Histologies in Anal Cancer -- Diagnosis and Management of Perianal Skin Tumors.
Sommario/riassunto	This book is a comprehensive overview of the epidemiology, pathogenesis, and treatment options available for anal cancer. Anal cancer is a relatively rare disease, but one increasing in incidence. Strides have been made in developing treatment paradigms through clinical trials, and proper management requires multidisciplinary interaction between radiation oncologists, surgeons, and medical oncologists as well as other physicians, nurses, and other medical professionals. The book thus covers all aspects of the disease to give clinicians and their teams the information necessary to develop a treatment program that focuses on improved patient outcomes. Chapters cover evaluation of the patient and cancer staging, current standard treatments, epidemiology, pathogenesis, issues involved in survivorship, and ongoing and future avenues of research into disease biology and novel treatments. This book is an ideal resource for

clinicians involved in the care of patients with anal cancer.
