Sommario/riassunto	Despite the growing interest in the intellectual history of early modern Arabs and Ottomans, many key figures of the period remain unknown. In this unique biographical account, edited and published here for the first time, Muammad Kaml al-Dn al-Ghazz (1760-1799), the chief Shafi'i jurisconsult of Damascus, introduces us to one of the leading figures of early modernity, 'Abd al-Ghan al-Nbulus (1641-1731). Being al-Nbulus's great grandson, al-Ghazz had direct access to the family's collective memory through his parents and grandparents, as well as to his great grandfather's scattered memoirs. Written about fifty years after al-Nbulus's death, al-Ghazz's biography, al-Wird al-Urs, remains the authoritative account of the great master's distinguished career, covering many aspects of his life and work in breadth, depth, and sophistication unmatched by any of the competing biographies.

Sommario/riassunto	Paul Spicker's new book takes the three founding principles of the French Revolution - Liberty, Equality, Fraternity - and examines how they relate to social policy today. The book considers the political and moral dimensions of a wide range of social policies, and offers a different way of thinking about each subject from the way it is usually analysed.
