Sommario/riassunto	This book clarifies the misconceptions and misinterpretations of the Chinese Path through historical and market logic. The author begins with a historical review of Chinese institutions from their cultural origins to their modern connotations: Chinese regard unity over individualism; Chinese are more cooperative, intrapersonal and defensive than competitive, invasive and expansive. The market economy is another factor that emphasizes the importance of a peaceful environment and stable system of international institutions so as to achieve sustainable development in China. In closing, the author provides an outlook on the role and responsibility of China as a great power towards developed countries, neighbors, new economic groups and developing countries. China's development means much to the world.
