

1. Record Nr.	UNINA9910350249103321
Titolo	Algebraic Topology and Related Topics // edited by Mahender Singh, Yongjin Song, Jie Wu
Pubbl/distr/stampa	Singapore : , : Springer Nature Singapore : , : Imprint : Birkhäuser, , 2019
ISBN	981-13-5742-0
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (XIII, 313 p. 73 illus., 10 illus. in color.)
Collana	Trends in Mathematics, , 2297-024X
Disciplina	514.2
Soggetti	Algebraic topology Functional analysis Algebraic Topology Functional Analysis
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Chapter 1. Homological infinity of 4D universe for every 3-manifold -- Chapter 2. On the exponents of $[J(X), \Omega(Y)]$ -- Chapter 3. Nielsen theory on the nilmanifold $\Gamma_{m+1}$ of the generalized Heisenberg group $\mathrm{Heis}^{m+1}$ -- Chapter 4. Vector field problem for homogeneous spaces -- Chapter 5. Lickorish type classification of closed manifolds over simple polytopes -- Chapter 6. Stable and unstable stratifications on classifying spaces of acyclic categories -- Chapter 7. Equivariant cohomology of torus orbifolds with two vertices -- Chapter 8. Free torus actions on products of Milnor manifolds -- Chapter 9. The cohomology classes of a point and the diagonal in flag manifolds -- Chapter 10. On a construction for the generators of the polynomial algebra as a module over the Steenrod algebra -- Chapter 11. KO-groups of stunted complex and quaternionic projective spaces -- Chapter 12. Homotopy groups of $(n-1)$ -connected $(2n+1)$ -manifolds -- Chapter 13. A note on the topology of polygonal spaces -- Chapter 14. Generalized unknotting number of virtual links.
Sommario/riassunto	This book highlights the latest advances in algebraic topology, from homotopy theory, braid groups, configuration spaces and toric topology, to transformation groups and the adjoining area of knot

theory. It consists of well-written original research papers and survey articles by subject experts, most of which were presented at the “7th East Asian Conference on Algebraic Topology” held at the Indian Institute of Science Education and Research (IISER), Mohali, Punjab, India, from December 1 to 6, 2017. Algebraic topology is a broad area of mathematics that has seen enormous developments over the past decade, and as such this book is a valuable resource for graduate students and researchers working in the field.
