

1. Record Nr.	UNINA9910350304403321
Autore	Zhang Bo
Titolo	m-Mode SVPWM Technique for Power Converters [[electronic resource] /] / by Bo Zhang, Dongyuan Qiu
Pubbl/distr/stampa	Singapore : , : Springer Singapore : , : Imprint : Springer, , 2019
ISBN	981-13-1382-2
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (198 pages)
Collana	CPSS Power Electronics Series, , 2520-8853
Disciplina	621.313
Soggetti	Production of electric energy or Systems theory Systems engineering Power Electronics, Electrical Machines and Networks Systems Theory, Control Circuits and Systems
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Preface -- Introduction -- m-Mode Control Method -- 3-Mode Control for Three-phase Four-line Inverter -- 4-Mode Control for Three-phase Four-line Inverter -- 6-Mode Control for Nine-switch Inverter -- m-Mode Control for Multilevel Inverter -- m-Mode Control for Modular Multilevel Converter -- m-Mode Control for PWM Rectifier.
Sommario/riassunto	This book presents a novel control method for power converters, referred to as m-mode control. It provides an overview of traditional control methods for inverters – e.g. PWM and SVPWM – and the theory of the m-mode control method, while also discussing and applying m-mode control on various types of converters (including three-phase, nine-switch, five-leg and multi-level inverters, PWM rectifiers and modular multi-level converters). The book provides readers with sufficient background and understanding to delve deeper into the topic of SVPWM control. It is also a valuable guide for engineers and researchers whose work involves power converter control. .
