

1. Record Nr.	UNINA9910350315203321
Autore	Mohamed Saiful Bahri
Titolo	Down Milling Trimming Process Optimization for Carbon Fiber-Reinforced Plastic [[electronic resource] /] / by Saiful Bahri Mohamed, Radzuwan Ab Rashid, Martini Muhamad, Jailani Ismail
Pubbl/distr/stampa	Singapore : , : Springer Singapore : , : Imprint : Springer, , 2019
ISBN	981-13-1804-2
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (76 pages)
Collana	SpringerBriefs in Applied Sciences and Technology, , 2191-530X
Disciplina	668.42
Soggetti	Manufactures Manufacturing, Machines, Tools, Processes
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Composite Materials and Types of Machining -- Cutting Parameters and The Machinability Performance -- The Carbon Fibre Reinforced Plastic Project -- Learning from the Carbon Fibre Reinforced Project -- Conclusion and Recommendations. .
Sommario/riassunto	This book offers recommendations on the milling processes for the carbon fiber reinforced plastic CFRP/AI2024. Due to the anisotropic and non-homogeneous structure of CFRP and the ductile nature of aluminum, the machining of this material is very challenging and causes various types of damage, such as matrix cracking and thermal alterations, fiber pullout and fuzzing during drilling and trimming, which affect the quality of machined surface. The book studies and models the machined surface quality of CFRP/AI2024 using a two-level full factorial design experiment. It describes the processes of trimming using down milling, and statistically and graphically analyzes the influence and interaction of cutting parameters. Lastly, the book presents the optimization of the cutting parameters in order to create a surface texture quality of CFRP/AI2024 to less than 1 µm.
