Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (203 pages)
Disciplina	307.1216
Soggetti	Climate change Sociology, Urban Climate Change Urban Studies/Sociology Climate Change Management and Policy
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Introduction - Climate Change and Cities: Perspectives, Planning, and People -- Stakeholder Methods to Climate Change and Sustainable Development -- Case Study Reviews: People, Perspective, and Planning -- The Review of Sustainable Development Goals (SDGs): People, Perspective and Planning -- Sustainable Urban Development in the Age of Climate Change.
Sommario/riassunto	This book considers the impact of climate change on cities, advocating that people are the panaceas and antidote to mitigating climate change, by enhancing their involvement in achieving sustainable development Goals (SDGs). This leads to the development of an SDG best practice participation template, which is supported by an extensive checklist of the 'whats' and 'hows' in participatory processes. Using case studies, extensive literature reviews and meta-analysis to make a case for a people-centric and integrated approach to sustainable urban development, the book examines the role of governance in climate change, focusing on decision making processes, policies and regulations, as well as focusing on the significance of a people-oriented approach on climate change and cities. Through an extensive

global outlook, it highlights bottom-up methods of implementing and achieving sustainable urban development in the age of climate change. These highlights should help to develop new mindsets, new strategies, new directions and new policies, through which we can see a more sustainable approach to urbanisation and urban development globally, which can start 'equipping future generations with the tools for them to help their future generations'.
