Nota di contenuto	Chapter 1 Trading Agent -- Chapter 2 Agent Description -- Chapter 3 Trading Process -- Chapter 4 Trading Environment -- Chapter 5 Use of Information -- Chapter 6 Trading Decisions -- Chapter 7 Pricing of Trading -- Chapter 8 Trading Stochastic Equation -- Chapter 9 Trading Network -- Chapter 10 Network Compactness -- Chapter 11 Trading Loop -- Chapter 12 Trading Potential -- Chapter 13 State Distribution -- Chapter 14 Trading Network Equation -- Chapter 15 System Equation -- Chapter 16 Economic Growth -- Chapter 17 Price Level -- Chapter 18 System Evolution -- Chapter 19 Measurement of Evolution -- Chapter 20 Evolutionary Model -- Chapter 21 Technological Evolution -- Chapter 22 Knowledge Evolution -- Chapter 23 Institutional Evolution -- Chapter 24 Phase Evolution -- Chapter 25 Network Evolution -- Chapter 26 Law of Evolution.
Sommario/riassunto	This book is devoted to establishing a completely new concept within economics referred to as "trading economics" which is a reconstructed economic system in theory that seeks perfect harmony between micro and macro elements in a structured way, hence making the economic theory a rigorous system supported by internal logical continuity. Representing a revolution of the existing theoretical framework, trading economics has changed the logic of mainstream economics.

Specifically, it deduces the "macro whole" from the "micro individuals", and it introduces a systematic and comprehensive analysis approach. It stresses that within an interconnected world, the interaction between trading agents is the fundamental driving force behind the operation, development and evolution of the economic system. .
