Sommario/riassunto	This book explores how smartphones affect teaching activities, students' behavior, and learning outcomes. The Internet and smartphones are a very recent phenomenon and are evolving very rapidly, and new devices, software apps and methodologies that may upset previous understandings are emerging on a regular basis. Based on the latest research, this book shares various current perspectives and encourages continuing dialog to allow the education community to react in a timely manner to any new developments, and as such improve classroom outcomes.
