Sommario/riassunto	Revisiting Marx's Critique of Liberalism offers a theoretical reconstruction of Karl Marx's new materialist understanding of justice, legality, and rights through the vantage point of his widely invoked but generally misunderstood critique of liberalism. The book begins by reconstructing Marx's conception of justice and rights through close textual interpretation and extrapolation. The central thesis of the book is, firstly, that Marx regards justice as an essential feature of any society, including the emancipated society of the future; and secondly,

that standards of justice and right undergo transformation throughout history. The book then tracks the enduring legacy of Marx's critique of liberal justice by examining how leading contemporary political theorists such as John Rawls, Jürgen Habermas, Axel Honneth, and Nancy Fraser have responded to Marx's critique of liberalism in the face of global financial capitalism and the hollowing out of democratically-enacted law. The Marx that emerges from this book is therefore a thoroughly modern thinker whose insights shed valuable light on some of the most pressing challenges confronting liberal democracies today.
