

1. Record Nr.	UNINA9910366579203321
Titolo	Advances in Sustainable Construction Materials and Geotechnical Engineering : Select Proceedings of TRACE 2018 // edited by Sanjay Kumar Shukla, Sudhirkumar V. Barai, Ankur Mehta
Pubbl/distr/stampa	Singapore : , : Springer Singapore : , : Imprint : Springer, , 2020
ISBN	981-13-7480-5
Edizione	[1st ed. 2020.]
Descrizione fisica	1 online resource (XIV, 280 p. 156 illus., 93 illus. in color.)
Collana	Lecture Notes in Civil Engineering, , 2366-2557 ; ; 35
Disciplina	624.15
Soggetti	Engineering geology Engineering—Geology Foundations Hydraulics Sustainable architecture Building materials Geoengineering, Foundations, Hydraulics Sustainable Architecture/Green Buildings Building Materials
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	1. Foreword -- 2. Industrial by-products as Construction Materials -- 3. Sustainable and Green Materials in Construction -- 4. Advancement in Geotechnical Engineering -- 5. Stabilization techniques.
Sommario/riassunto	This book comprises select papers presented at the International Conference on Trends and Recent Advances in Civil Engineering (TRACE 2018). The topics covered include the utilization of industrial by-products as construction materials, sustainable and green materials in construction applications, and latest measures adopted for stabilization techniques. The book also discusses recent advances and techniques related to geotechnical and concrete domain that can be used as a reference guide for various researchers and practitioners around the globe.
