1.	Record Nr.	UNINA9910366584403321
	Titolo	Advances on Broad-Band Wireless Computing, Communication and Applications : Proceedings of the 14th International Conference on Broad-Band Wireless Computing, Communication and Applications (BWCCA-2019) / / edited by Leonard Barolli, Peter Hellinckx, Tomoya Enokido
	Pubbl/distr/stampa	Cham : , , : Springer International Publishing : , , : Imprint : Springer, , 2020
	ISBN	3-030-33506-2
	Edizione	[1st ed. 2020.]
	Descrizione fisica	1 online resource (xlvi, 875 pages)
	Collana	Lecture Notes in Networks and Systems, , 2367-3389 ; ; 97
	Disciplina	621.382
	Soggetti	Telecommunication Computational intelligence Communications Engineering, Networks Computational Intelligence
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Sommario/riassunto	This proceedings book presents the latest research findings, innovative research results, methods and development techniques related to the emerging areas of broadband and wireless computing, from both theoretical and practical perspectives. Today's information networks are going through a rapid evolution. Different kinds of networks with different characteristics are emerging, and are being integrated into heterogeneous networks. As a result, there are numerous interconnection problems that can occur at different levels of the hardware and software design of communicating entities and communication networks. Such networks need to manage an increasing usage demand, provide support for a significant number of services, guarantee their QoS, and optimize the network resources. The success of all-IP networking and wireless technology has changed the way of living for people around the globe. Advances in electronic integration and wireless communications will pave the way tooffering access to

wireless networks on the fly, which in turn will allow electronic devices to share information with each other wherever and whenever necessary.
