	Formato	Materiale a stampa
	Livello bibliografico	Monografia
2.	Record Nr.	UNINA9910366592803321
	Titolo	New Results in Numerical and Experimental Fluid Mechanics XII : Contributions to the 21st STAB/DGLR Symposium, Darmstadt, Germany, 2018 / / edited by Andreas Dillmann, Gerd Heller, Ewald Krämer, Claus Wagner, Cameron Tropea, Suad Jakirli
	Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2020
	ISBN	3-030-25253-1
	Edizione	[1st ed. 2020.]
	Descrizione fisica	1 online resource (XVII, 867 p. 627 illus., 475 illus. in color.)
	Collana	Notes on Numerical Fluid Mechanics and Multidisciplinary Design, , 1860-0824 ; ; 142
	Disciplina	620.1064
	Soggetti	Fluid mechanics Continuum mechanics Aerospace engineering Astronautics Engines Engineering Fluid Dynamics Continuum Mechanics Aerospace Technology and Astronautics Engine Technology

Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This book gathers contributions to the 21st biannual symposium of the German Aerospace Aerodynamics Association (STAB) and the German Society for Aeronautics and Astronautics (DGLR). The individual chapters reflect ongoing research conducted by the STAB members in the field of numerical and experimental fluid mechanics and aerodynamics, mainly for (but not limited to) aerospace applications, and cover both nationally and EC-funded projects. Special emphasis is given to collaborative research projects conducted by German scientists and engineers from universities, research-establishments and industries. By addressing a number of cutting-edge applications, together with the relevant physical and mathematics fundamentals, the book provides readers with a comprehensive overview of the current research work in the field. The book's primary emphasis is on aerodynamic research in aeronautics and astronautics, and in ground transportation and energy as well.
