Sommario/riassunto	Global developments in basic income have reinvigorated political debates on the necessity of progressing to universal basic income implementation. Basic income is a powerful strategy for addressing poverty gaps and growing inequality. This book provides new insights and strategies from an Australian political economy perspective to respond to implementation challenges and distributive justice. The

book positions the disability dimension and disability pensions in relation to basic income to explore strategies for strengthening universal provisions. It illustrates the need for socially just conditions and adequate financing to underpin redistribution as a way of safeguarding the sustainability of basic income.
