

1. Record Nr.	UNINA9910366633503321
Autore	Talalay Pavel G
Titolo	Thermal Ice Drilling Technology // by Pavel G. Talalay
Pubbl/distr/stampa	Singapore : , : Springer Nature Singapore : , : Imprint : Springer, , 2020
ISBN	981-13-8848-2
Edizione	[1st ed. 2020.]
Descrizione fisica	1 online resource (XII, 278 p. 348 illus., 176 illus. in color.)
Collana	Springer Geophysics, , 2364-9127
Disciplina	550 526.1
Soggetti	Geophysics Geotechnical engineering Physical geography Geotechnical Engineering and Applied Earth Sciences Physical Geography
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Hot-Point Drills -- Electric Thermal Coring Drills -- Hot-Water Ice Drills -- Steam Ice Drills -- Perspectives For Future Development of Thermal Ice-Drilling Technology.
Sommario/riassunto	This book provides a review of thermal ice drilling technologies, including the design, parameters, and performance of various tools and drills for making holes in ice sheets, ice caps, mountain glaciers, ice shelves, and sea ice. In recent years, interest in thermal drilling technology has increased as a result of subglacial lake explorations and extraterrestrial investigations. The book focuses on the latest ice drilling technologies, but also discusses the historical development of ice drilling tools and devices over the last 100 years to offer valuable insights into what is possible and what not to do in the future. Featuring numerous figures and pictures, many of them published for the first time, it is intended for specialists working in ice-core sciences, polar oceanography, drilling engineers and glaciologists, and is also a useful reference for researchers and graduate students working in engineering and cold-regions technology.
