

1. Record Nr.	UNINA9910366639203321
Titolo	E-waste Recycling and Management : Present Scenarios and Environmental Issues / / edited by Anish Khan, Inamuddin, Abdullah M. Asiri
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2020
ISBN	3-030-14184-5
Edizione	[1st ed. 2020.]
Descrizione fisica	1 online resource (244 pages)
Collana	Environmental Chemistry for a Sustainable World, , 2213-7122 ; ; 33
Disciplina	621.38150286 628.4
Soggetti	Refuse and refuse disposal Chemistry, Technical Environmental management Waste Management/Waste Technology Industrial Chemistry Environmental Management
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	1. Solution and Challenges in recycling waste cathode-ray tube -- 2. Reconfigurable recycling systems of e-waste -- 3. An Economic Assessment of Present and Future Electronic Waste Streams: Japan's Experience -- 4. Recent technologies in electronic waste management -- 5. Recycling challenges for electronic consumer products to e-waste: A developing countries perspective -- 6. Chemical recycling of electronic waste for clean fuel production -- 7. Management of electrical and electronic equipment in European Union countries: a comparison -- 8. E-waste management from macroscopic to microscopic scale -- 9. Recycling processes for the recovery of metal from e-waste of the LED industry -- 10. E-waste management and the conservation of geochemical scarce resources -- 11. Sustainable electronic waste management: Implications on environmental and human health -- 12. E-waste and their implications on the environmental and human health.

Sommario/riassunto

This book gives up-to-date information and broad views on e-waste recycling and management using the latest techniques for industrialist and academicians. It describes the problems of e-waste generated by all global living communities and its impact on our ecosystems and discusses recycling techniques in detail to reduce its effect as well as proper management of e-waste to save the environment. It also considers future technological expectations from e-waste recycling and management technologies. .
