Sommario/riassunto	This book demonstrates how colleges might retain threatened varsity programs and expand sports opportunities for women students if they replaced the current commercial model with one that emphasizes student participation. This would benefit the college students who play varsity sports, instead of benefiting the coaches, athletic directors, or over-generous boosters who dominate many programs.  In Title IX, the federal law prohibiting sex discrimination in education, schools have been handed a golden opportunity to bring fiscal sanity and academic integrity back to their campuses by once again

Sommario/riassunto

This book examines how institutional and environmental features in neighbourhoods can contribute to social resilience, highlighting the related socio-demographic issues, as well as the infrastructure, planning, design and policies issues. It is divided into three themes – infrastructure, planning, and community. Infrastructure examines how physical features such as parks and street patterns influence neighborliness and resilience, while planning studies how urban design enhances social interactions. Lastly, community discusses policies that can forge social bonds, either through racial integration, grassroots activities, or social service. Overall, the book combines research and empirical work with scholarly models of resilience and governance philosophy, focusing on Singapore's urban planning and social policies.
