

1. Record Nr.	UNINA9910366646403321
Titolo	Green Technologies and Infrastructure to Enhance Urban Ecosystem Services : Proceedings of the Smart and Sustainable Cities Conference 2018 // edited by Viacheslav Vasenev, Elvira Dovletyarova, Zhongqi Cheng, Riccardo Valentini, Carlo Calfapietra
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2020
ISBN	3-030-16091-2
Edizione	[1st ed. 2020.]
Descrizione fisica	1 online resource (293 pages)
Collana	Springer Geography, , 2194-315X
Disciplina	307.12 307.1216
Soggetti	Regional planning Urban planning Urban ecology (Biology) Sustainable development Soil science Soil conservation Environmental geography Landscape/Regional and Urban Planning Urban Ecology Sustainable Development Soil Science & Conservation Environmental Geography
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	These proceedings of the Smart and Sustainable Cities Conference (SSC) in Moscow from May 23 to 26, 2018 addresses important questions regarding the global trend of urbanization. What are the environmental consequences of megacities' expansion? What smart solutions can make life in cities safe, comfortable and environmentally friendly? It is projected that 70% of the global population will live in cities by 2050,

and as such the book describes how this rapid urbanization will alter the face of the world. Focusing on solutions for the environmental problems of modern megapolises, it discusses advanced approaches and smart technologies to monitor, model and assess the environmental consequences and risks. The contributors present examples of successful sustainable urban development, including management and design of green infrastructure, waste management, run-off purification and remediation of urban soils. The SSC conference and its proceedings offer a valuable contribution to sustainable urban development, and are of interest to the scientific and research community, municipal services, environmental protection agencies, landscape architects, civil engineers, policy makers and other stakeholders in urban management and greenery.
