

1. Record Nr.	UNINA9910366652703321
Autore	Mino Takashi
Titolo	Framing in Sustainability Science [[electronic resource]] : Theoretical and Practical Approaches // edited by Takashi Mino, Shogo Kudo
Pubbl/distr/stampa	Singapore, : Springer Nature, 2020 Singapore : , : Springer Singapore : , : Imprint : Springer, , 2020
ISBN	981-13-9061-4
Edizione	[1st ed. 2020.]
Descrizione fisica	1 online resource (VIII, 196 p. 65 illus., 56 illus. in color.)
Collana	Science for Sustainable Societies, , 2197-7348
Disciplina	338.927
Soggetti	Sustainable development Regional planning Urban planning Nature conservation Economic development—Environmental aspects Environmental education Sustainable Development Landscape/Regional and Urban Planning Nature Conservation Development and Sustainability Environmental and Sustainability Education
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Part 1 Theoretical Approaches/ Theoretical Approaches to sustainability issues -- Theoretical and methodological pluralism in sustainability science -- Approaches for framing sustainability challenges: experiences from Swedish sustainability science education -- Part 2 Practical Approaches / Practical Approaches to sustainability issues -- The value of grey -- Framing in place making when envisioning a sustainable rural community in the time of aging and shrinking societies in Japan -- Role of Framing in sustainability science: The case of Minamata disease -- Time scales in framing disaster risk reduction in sustainability -- Food security framing and poverty alleviation -- Part 3 Conclusion/ Epilogue -- Linking framing to actions for

sustainability.

Sommario/riassunto

This open access book offers both conceptual and empirical descriptions of how to “frame” sustainability challenges. It defines “framing” in the context of sustainability science as the process of identifying subjects, setting boundaries, and defining problems. The chapters are grouped into two sections: a conceptual section and a case section. The conceptual section introduces readers to theories and concepts that can be used to achieve multiple understandings of sustainability; in turn, the case section highlights different ways of comprehending sustainability for researchers, practitioners, and other stakeholders. The book offers diverse illustrations of what sustainability concepts entail, both conceptually and empirically, and will help readers become aware of the implicit framings in sustainability-related discourses. In the extant literature, sustainability challenges such as climate change, sustainable development, and rapid urbanization have largely been treated as “pre-set,” fixed topics, while possible solutions have been discussed intensively. In contrast, this book examines the framings applied to the sustainability challenges themselves, and illustrates the road that led us to the current sustainability discourse.
