Edizione	[1st ed. 2020.]
Descrizione fisica	1 online resource (173 pages)
Collana	Green Energy and Technology, , 1865-3537
Disciplina	307.1216
Soggetti	Sociology, Urban Sustainability Urban economics Operations research Urban Sociology Urban Economics Operations Research and Decision Theory
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Sustainability strategies and human well being -- Environmental improvement benefits and values creation -- Economics and decision making in urban regeneration.
Sommario/riassunto	This book features a selection of the best papers presented at two SIEV seminars held in Venice, Italy, in September 2017 and 2018, in the context of the Urbanpromo Green events. Bringing together experts from a diverse range of fields – economics, appraisal, architecture, energy, urban planning, sociology, and the decision sciences – and government representatives, the seminars encouraged reflections on the role of future cities in terms of sustainable development, with a particular focus on improving collective and individual well-being. The book provides a multidisciplinary approach to contemporary green urban agendas and urban sustainability, and addresses the demand for policies and strategies to strengthen resilience through concrete

measures to reduce energy consumption, mitigate pollution, promote social inclusion and create urban identity.
