Sommario/riassunto	This book explores the career experiences of Generation A, the half-million individuals with autism spectrum disorder (ASD) who will reach adulthood in the next decade. With Generation A eligible to enter the workforce in unprecedented numbers, research is needed to help individuals, organizations, and educational institutions to work together to create successful work experiences and career outcomes

for individuals with ASD. Issues surrounding ASD in the workplace are discussed from individual, organizational, and societal perspectives. This book also examines the stigma of autism and how it may affect the employment and career experiences of individuals with ASD. This timely book provides researchers, practitioners, and employers with empirical data that examines the work and career experiences of individuals with ASD. It offers a framework for organizations committed to hiring individuals with ASD and enhancing their work experiences and career outcomes now and in the future.
