Record Nr.	UNINA9910367258503321
Autore	Li Jin-Hua
Titolo	The Behavioral Ecology of the Tibetan Macaque [[electronic resource] /] / edited by Jin-Hua Li, Lixing Sun, Peter M. Kappeler
Pubbl/distr/stampa	Cham, : Springer Nature, 2020 Cham : , : Springer International Publishing : , : Imprint : Springer, , 2020
ISBN	3-030-27920-0
Edizione	[1st ed. 2020.]
Descrizione fisica	1 online resource (XVI, 299 p. 93 illus., 59 illus. in color.)
Collana	Fascinating Life Sciences, , 2509-6745
Disciplina	591.5
Soggetti	Behavioral sciences
	Physical anthropology
	Cognitive psychology
	Animal welfare
	Animal ecology
	Wildlife Fish
	Behavioral Sciences
	Biological and Physical Anthropology
	Cognitive Psychology
	Animal Welfare/Animal Ethics
	Animal Ecology
	Fish & Wildlife Biology & Management
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Part I: Introduction Chapter 1: Recent developments in primatology and their relevance to the study of Tibetan macaques Part II: Social Behavior and Dynamics in Tibetan Macaques Chapter 2: Social and Life History Strategies of Tibetan Macaques at Mt. Huangshan Chapter 3: Size Matters in Primate Societies: How Social Mobility Relates to Social Stability in Tibetan and Japanese Macaques Chapter 4: Behavioral exchange and interchange as strategies to facilitate social relationships in Tibetan macaques Chapter 5: Social relationships
	Behavioral exchange and interchange as strategies to facilitate social

	impact collective decision-making in Tibetan macaques Chapter 6: Considering Social Play in Primates: A Case Study in Juvenile Tibetan Macaques (Macacathibetana) Chapter 7: The Vocal Repertoire of Tibetan Macaques (Macacathibetana) and Congeneric Comparisons Chapter 8: Tibetan Macaque Social Style: Co-variant and Quasi- independent Evolution Part III: Evolution of Rituals: Insights from Bridging Behavior Chapter 9: Preliminary observations of female- female bridging behavior in Tibetan macaques (Macacathibetana) at Mt. Huangshan, China Chapter 10: Bridging Behavior and Male-Infant Interactions in Macacathibetana and M. assamensis: Insight into the Evolution of Social Behavior in the sinica Species-group of Macaques Part IV: Livingwith Microbes, Parasites, and Diseases Chapter 11: The gut microbiome of Tibetan macaques: composition, influencing factors and function in feeding ecology Chapter 12: Medicinal Properties in the Diet of Tibetan Macaques at Mt. Huangshan - A Case for Self- medication Chapter 13: Primate infectious disease ecology: Insights and future directions at the human-macaque interface Part V: Emerging Technologies in Primatology Chapter 14: High field MRI technology for behavioral and cognitive studies in macaques in vivo.
Sommario/riassunto	This open access book summarizes the multi-disciplinary results of one of China's main primatological research projects on the endemic Tibetan macaque (Macaca thibetana), which had continued for over 30 years, but which had never been reported on systematically. Dedicated to this exceptional Old World monkey, this book makes the work of Chinese primatologists on the social behavior, cooperation, culture, cognition, group dynamics, and emerging technologies in primate research accessible to the international scientific community. One of the most impressive Asian monkeys, and the largest member of its genus, the Tibetan macaque deserves to be better known. This volume goes a long way towards bringing this species into the spotlight with many excellent behavioral analyses from the field Frans de Waal, Professor of Psychology, Emory University, USA. Macaques matter. To understand primate patterns and trends, and to gain important insight into humanity, we need to augment and expand our engagement with the most successful and widespread primate genus aside from Homo. This volume focuses on the Tibetan macaque, a fascinating species with much to tell us about social behavior, physiology, complexity and the macaque knack for interfacing with humans. This book is doubly important for primatology in that beyond containing core information on this macaque species, it also reflects an effective integrated collaboration between Chinese scholars and a range of international colleagues—exactly the type of collaborative engagement primatology Agustin Fuentes, Professor of Anthropology, University of Notre Dame, USA. I have many fond memories of my association with Mt. Huangshan research beginning in 1983, when together with Professor Qishan Wang we established this site. It is such a beautiful place and I miss it. It is gratifying to see how far research has progressed since we began work there, becoming more internationalized and very much a collaborative endeavor under the long-term direction of Professor Jin-Hua Li an
