

1. Record Nr.	UNISALENTO991000498209707536
Autore	Cini, Luigi
Titolo	Venezia e la Polonia nei secoli dal 17. al 19. / a cura di Luigi Cini
Pubbl/distr/stampa	Venezia ; Roma : Istituto per la collaborazione culturale, 1968
Descrizione fisica	XVIII, 431 p. : 37 tav. ; 23 cm.
Collana	Civiltà veneziana. Studi
Disciplina	945.31
Soggetti	Polonia Venezia - Rapporti con la Polonia
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Convegno promosso dalla Fondazione Giorgio Cini, dall'Accademia polacca delle scienze, dal Ministero delle scuole superiori di Polonia con la collaborazione dell'Associazione culturale italo-polacca Francesco Nullo di Venezia, Venezia, Isola di San Giorgio Maggiore, 28 maggio-2 giugno 1963

2. Record Nr.	UNINA9910367566903321
Autore	Tsai Wen-Hsien
Titolo	Modeling and Simulation of Carbon Emission Related Issues / Wen-Hsien Tsai
Pubbl/distr/stampa	MDPI - Multidisciplinary Digital Publishing Institute, 2019 Basel, Switzerland : , : MDPI, , 2019
ISBN	9783039213122 3039213121
Descrizione fisica	1 electronic resource (420 p.)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Carbon emissions reached an all-time high in 2018, when global carbon dioxide emissions from burning fossil fuels increased by about 2.7%, after a 1.6% increase in 2017. Thus, we need to pay special attention to carbon emissions and work out possible solutions if we still want to meet the targets of the Paris climate agreement. This Special Issue collects 16 carbon emissions-related papers (including 5 that are carbon tax-related) and 4 energy-related papers using various methods or models, such as the input-output model, decoupling analysis, life cycle impact analysis (LCIA), relational analysis model, generalized Divisia index model (GDIM), forecasting model, three-indicator allocation model, mathematical programming, real options model, multiple linear regression, etc. The research studies come from China, Taiwan, Brazil, Thailand, and United States. These researches involved various industries such as agricultural industry, transportation industry, power industry, tire industry, textile industry, wave energy industry, natural gas industry, and petroleum industry. Although this Special Issue does not fully solve our concerns, it still provides abundant material for implementing energy conservation and carbon emissions reduction. However, there are still many issues regarding the problems caused by global warming that require research.
