Sommario/riassunto	<p>Luciano Concheiro's 'Contra o Tempo: Filosofia Prática do Instante' explores the concept of time acceleration in contemporary society. The book examines how the modern world's obsession with speed affects various aspects of life, including politics, economics, culture, and social structures. Concheiro utilizes a clear and incisive writing style to deliver his reflections in concise and thought-provoking capsules. The author critiques the capitalist model of accelerated time as a mechanism of social exclusion, where only a few can keep pace with the rapid changes, thus widening the gap between the wealthy and the poor. By referencing historical advancements and contemporary technologies, Concheiro provides a genealogical analysis of time, highlighting how the relentless push for speed impacts daily life and perpetuates inequality. This work is intended for readers interested in philosophy, sociology, and the socio-economic dynamics of modernity.</p>
