

1. Record Nr.	UNINA9910367658003321
Titolo	Forensic imaging
Pubbl/distr/stampa	[Oxford] : , : Elsevier Ltd., , [2020]-
ISSN	2666-2256
Descrizione fisica	1 online resource
Soggetti	Forensic radiography Magnetic resonance imaging Diagnostic imaging Forensic Medicine Diagnostic Imaging Autopsy Criminalística Medicina legal Periodical Periodicals. Revistes electròniques.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Periodico
Note generali	Refereed/Peer-reviewed
Sommario/riassunto	Forensic Imaging is dedicated to all aspects of forensic imaging and its implications for forensic medicine. Forensic Imaging covers various noninvasive and minimally invasive examination methods in a forensic context, mainly around the context of postmortem imaging, but also in conjunction with clinical forensic cases. Research subjects that are associated with these domains also include forensic veterinary investigations, forensic anthropology, as well as the use of 3D data acquired with a variety of imaging sensors.
