

1. Record Nr.	UNINA9910367719103321
Autore	Roberto Delle Donne
Titolo	Libri elettronici: Pratiche della didattica e della ricerca : Electronic Books: Teaching and Research Practices
Pubbl/distr/stampa	FedOA - Federico II University Press, 2005
Descrizione fisica	1 electronic resource (197 p.)
Collana	Saperi storici e nuove tecnologie
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>This proceedings e-book contains papers presented at the national Symposium on "Electronic Books and the practices of scholarly research", held in Naples, Italy, on 20 June 2003. The advent of new technologies, tools, and digital resources is changing how scholars conduct their work, keep updated in their field or fields of study, and think about research. Moving from the reconstruction of the market of scientific communication, copyright policies, and management of long-term conservation strategies, the published papers aim to discuss the ways in which scholarly practices have changed in the last decades, even since the end of the last century, in teaching and in research, in various disciplines like history, physics and biomedical sciences.</p>
