

1. Record Nr.	UNINA9910794456203321
Autore	Fernandez Perez Paloma <1964->
Titolo	Emergence of modern hospital management and organisation in the world 1880s-1930s // Paloma Fernandez Perez
Pubbl/distr/stampa	Bingley, England : , : Emerald Publishing Limited, , [2021] ©2021
ISBN	1-78769-989-7
Descrizione fisica	1 online resource (167 pages) : illustrations
Disciplina	362.1068
Soggetti	Medicine Hospitals - Administration - History - 19th century Hospitals - Administration - History - 20th century Medicine - History - 19th century Medicine - History - 20th century
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Chapter 1. Health spending and hospitals in the world in a long term perspective -- Chapter 2. New hospitals and new ideas for the management of large hospitals in western Europe (1880s-1930s) -- Chapter 3. New ideas in hospital organization in the United States of America: war needs, industrial organization, philanthropy, and the new scientific medicine -- Chapter 4. New hospital organization in Russia and Asia. Between capitalism, communism, and imperialism -- Chapter 5. Latin America. Between local innovation and the influence of colonial times, Western European science and North American standardization forces -- Chapter 6. New models of hospital organization and management in the early 20th century in a large city: Barcelona -- Chapter 7. Conclusions. New hospitals, new managers, new patterns of hospital organization.
Sommario/riassunto	The Emergence of Modern Hospital Management and Organization in the World 1880s-1930s analyzes core themes from a business history perspective to reach a new understanding about the history of modern large scale healthcare institutions, from the United States to China, with particular attention to Spain.

Titolo	Special External Effects on Fluvial System Evolution
Pubbl/distr/stampa	MDPI - Multidisciplinary Digital Publishing Institute, 2019
ISBN	3-03921-545-0
Descrizione fisica	1 online resource (200 p.)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>Rivers are an excellent witness of the dynamics affecting Earth's surface due to their sedimentary products and morphological expression, which may be considered as fluvial archives. Until now, the focus has been on evaluating the general impact of individual external factors. However, the importance of the specific environmental characteristics of these factors has become increasingly recognized, as highlighted in recent case studies. For example, the effects of regional climate, differentiated topography and vegetation, and frozen ground appear to play an essential role in the evolution of the fluvial system. Integration of such environmental conditions in the processes that were active within the complex fluvial system will open new perspectives in our progressive understanding of the evolution of landscape form, ecology, sediment fluxes, and hydrology of the system within the framework of the external drivers such as tectonics, general climate, and human activity. This is an appealing challenge that we wish to address in the present Special Issue under the aegis of the Fluvial Archives Group (FLAG).</p>
